WORK EXPERIENCE

YouGotaGift Pvt Ltd

Mar. 2021 – Jun. 2023

Software Engineer

Calicut, IN

- Developed and maintained a mission-critical microservice that streamlined merchant onboarding, configuration, and brand showcasing, improving user experiences and driving substantial revenue growth.
- Created a custom package for automated webhook consumption, eliminating coding efforts across teams and reducing deployment time for new microservices by 20%.
- Designed, implemented and maintained RESTful APIs using Django Rest Framework, improving microservice communication and payload handling, enhancing system functionality and data flow.
- Managed the project repository with Git and GitHub, consistently pushing updates and collaborating with cross-functional teams to ensure smooth integration of microservices.
- Engaged with product teams and clients to gather and refine requirements, aligning development efforts with business goals through regular meetings.
- Evaluated and executed new feature requests, assessing feasibility, providing stakeholder feedback, and developing enhancements that improved project outcomes.
- Documented all technical implementations, providing clarity and accessibility for developers and stakeholders.

Piserve Technologies

Jun. 2019 – Feb 2020

Linux Server Administrator

Kochin, IN

- Managed over 50+ Linux servers, ensuring 99.9% uptime.
- Automated server monitoring scripts, reducing manual intervention by 30%.
- Implemented and maintained robust security measures, preventing potential threats and enhancing overall system protection.
- Managed and optimized web hosting environments using cPanel and WHM, improving server efficiency and resource utilization.
